## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0264352.

There is disclosed in the European patent a container receiving unit for use with an apparatus for preparing a beverage, the container receiving unit comprising: a receiving space 55 for receiving a container 57 arranged for holding a beverage base material; a reservoir 58 for containing the beverage; a distribution system, comprising an inlet connected to the reservoir, at least two outlets 59 for dispensing the beverage, and a liquid flow path 60 extending from the inlet to the outlets; and means 56 for evenly distributing the beverage over the two outlets by reducing the speed of the beverage flowing from the reservoir to the outlets, the means including a wall extending transversely to the liquid flow path and restricting an area of the flow path.

In regards to claim 4, the means and outlets form an inverted v-shape in cross section.

In regards to claims 9 and 10, it is stated in the European patent that the container receiving unit is used with a beverage preparing apparatus. And, it is

Art Unit: 3742

inherently taught that a beverage preparing apparatus comprises a water unit for supplying hot water.

***Allowable Subject Matter***

Claims 5-8 are allowed.
